North Carolina State University - ClassEval Report	
Emplid: 001123529	Name: Jonathan Williams -- Course: Statistical Reasoni
Term: 2024 Fall	ST 453 001 Courses surveyed - ST 453 001
Question	**Response**
Comment on strengths and weaknesses of the course	This course seems to be very high level in scope, it utilizes a lot of ST 422 content as intuition and examples. Knowing the content of 422 significantly helped me, I fear this could easily have hindered students who hadn't taken this course as it is not a prerequisite.
--------	--------
Comment on strengths and weaknesses of the instructor	The midterm and final project instructions are unclear but then graded less than leniently. The grading would be far if there was more structure to the projects.
Comment on strengths and weaknesses of the course	The midterm project should be weighted slightly less - make the midterm and final projects a little more equal.
