North Carolina State University
Raleigh, NC

Jonathan P Williams

PROFESSIONAL POSITIONS

Associate Professor (with tenure), Department of Statistics, NC State University 2025 -
Visiting Fellow, Centre for Adv. Study, Norwegian Academy of Science and Letters 2022 - 2023
Assistant Professor (tenure-track), Department of Statistics, NC State University 2019 - 2025
Research Collaborator, Mayo Clinic, Rochester, MN 2017 - 2020
Biostatistics Intern, Mayo Clinic, Rochester, MN Summer 2016
Statistical Consultant, Caster Concepts, Inc, Albion, MI 2011 - 2014

Associate Editor, *Journal of Statistical Planning and Inference* 2026 -
Associate Editor, *Journal of the American Statistical Association: Reviews* 2023 -
Associate Editor, *The American Statistician: Reviews* 2023 -

EDUCATION

University of North Carolina, Chapel Hill, NC 2014 - 2019
Department of Statistics and Operations Research
PhD Statistics
Advisor: Professor Jan Hannig

New York University, New York, NY 2012 - 2014
Courant Institute of Mathematical Sciences
MS Mathematics

FUNDING

9. REU site: Directed research for undergraduates in mathematics and statistics (DRUMS) (2026-2027). NSA H98230-20-1-0259 and H98230-21-1-0014, **co-PI, 125,000 USD**.
8. AI-driven science: Valid statistical inference with regularization (2025). NC State College of Sciences Research Initiative Funds, **sole-PI, 3,000 USD**.
7. Statistical foundations for uncertainty quantification of machine intelligence assembled from generalized fiducial inference (2023-2024). NC State Faculty Research and Professional Development Fund, **sole-PI, 7,000 USD**.
6. Seed grant: Hidden Markov methodology for assessing racial stressors (2023-2024). NC State Data Science Academy, **PI, 50,000 USD**.
5. R56: Hidden Markov methodology for machine learning applied to identifying physiological states of shock in the intensive care unit via biomedical and unstructured text data (2021-2023). NIH R56HL155373, **sole-PI, 494,527 USD**.
4. REU site: Directed research for undergraduates in mathematics and statistics (DRUMS) (2024-2027). NSF 2349611, **Faculty Associate, 560,000 USD**.
3. REU site: Directed research for undergraduates in mathematics and statistics (DRUMS) (2024-2025). NSA H98230-20-1-0259 and H98230-21-1-0014, **Faculty Associate, 125,000 USD**.
2. REU site: Directed research for undergraduates in mathematics and statistics (DRUMS) (2021-2025). NSF 2051010, **Faculty Associate, 488,397 USD.**

1. REU site: Directed research for undergraduates in mathematics and statistics (DRUMS) (2021-2022). NSA H98230-20-1-0259 and H98230-21-1-0014, **Faculty Associate, 125,000 USD.**

13. N Giertych†, A Shaban, P Haravu⋆, and **J P Williams** (2024). A statistical primer on classical period-finding techniques in astronomy. **Reports on Progress in Physics** 87 (7) 078401 pp.1–18.
12. S Nghiem, **J P Williams**, C Afoakwah, Q Huynh, S K Ng, and J Byrnes (2021). Can administrative health data improve the gold standard? Evidence from a model of the progression of myocardial infarction. **International Journal of Environmental Research and Public Health** 18 (14) pp.7385.
11. E Sechi, E Shosha, **J P Williams**, S J Pittock, B G Weinshenker, B M Keegan, N L Zalewski, A S Lopez-Chiriboga, J Jitprapaikulsan, and E P Flanagan (2019). Aquaporin-4 and MOG autoantibody discovery in idiopathic transverse myelitis epidemiology. **Neurology** 93 (4) pp.e414–e420.

Preprints

10. R Martin, S Prim†, and **J P Williams** (202x). Induction and the rule of succession through a possibilistic inferential model lens. **In review**.
9. E Yanchenko, **J P Williams**, and R Martin (202x). Universal inference for model selection on networks. **In review**.
8. E B Kendall†, **J P Williams**, C B Storlie, M A Radosevich, E D Wittwer, and M A Warner (202x). Identification of physiological shock in intensive care units via Bayesian regime switching models. **In review**.
7. A Basarkar⋆, E B Kendall†, D Randahl, **J P Williams**, G H Hermansen (202x). Conflict forecasting via conformal prediction for Markov processes. **In review**.
6. N Dey† and **J P Williams** (202x). Valid inference for machine learning model parameters. **R&R Electronic Journal of Statistics**.
5. A Murph†, C B Storlie, P M Wilson, **J P Williams**, and J Hannig (202x). Bayes Watch: Bayesian change–point detection for process monitoring with fault detection. **In review**.
4. Y Liu and **J P Williams** (202x). An improved solution to the two normal means problem via regularization. **In review**.
3. R Martin, N Singer†, and **J P Williams** (202x). Valid and efficient possibilistic structure learning in Gaussian linear regression. **In review**.
2. D Randahl, A Hjort, and **J P Williams** (202x). pintervals: an R package for model-agnostic prediction intervals. **In review at Journal of Statistical Software**.
1. I Carmichael, T Keefe, N Giertych†, and **J P Williams** (2021). yaglm: A Python package for fitting and tuning generalized linear models that supports structured, adaptive and non-convex penalties. arXiv preprint arXiv:2110.05567.

PRESENTATIONS

44. Conformal prediction of fatalities from armed conflict. *30th Nordic Conference in Mathematical Statistics*, Helsinki, Finland, June 2026.
43. Transfer learning with uncertainty quantification: Random effect calibration of source to target (RECaST). *Seminar*, Department of Statistics, Michigan State University, January 2026.

42. Transfer learning with uncertainty quantification: Random effect calibration of source to target (RECaST). *IMS International Conference on Statistics and Data Science*, Seville, Spain, December 2025.

41. Transfer learning with uncertainty quantification: Random effect calibration of source to target (RECaST) and extensions. *Seminar*, Department of Statistics, Florida State University, November 2025.

40. Transfer learning with uncertainty quantification: Random effect calibration of source to target (RECaST). *Joint Statistical Meeting*, Nashville, TN, August 2025.

39. Asymptotic efficiency of inferential models and a possibilistic Bernstein–von Mises theorem. *3rd Workshop on Game-theoretic Statistics and Sequential, Anytime-Valid Inference (SAVI)*, Chennai Mathematical Institute, India, July 2025.

38. Topics in modern HMMs: Time-inhomogeneity and applications to conflict research. *CANSSI CRT Workshop on HMMs*, Department of Statistics, University of British Columbia, February 2025.

37. Imprecision in statistical learning. *Seminar*, Department of Statistics and Data Science, Cornell University, February 2025.

36. Imprecision in decision theory. *IMS International Conference on Statistics and Data Science*, Nice, France, December 2024.

35. Anytime-valid generalized universal inference on risk minimizers. *Conference on Statistical Learning and Data Science*, Newport Beach, CA, November 2024.

34. Large-sample theory for inferential models: A possibilistic Bernstein–von Mises theorem. *8th International Conference, BELIEF*, Belfast, UK, September 2024.

33. Decision theory via model-free generalized fiducial inference. *8th International Conference, BELIEF*, Belfast, UK, September 2024.

32. Model-free generalized fiducial inference for empirical risk minimizers. *Joint Statistical Meeting*, Portland, OR, August 2024.

31. Model-free generalized fiducial inference for empirical risk minimizers. *2024 WNAR/IMS/Graybill Annual Meeting*, Colorado State University, June 2024.

30. A tutorial on conformal prediction and new ideas for model-free statistical inference. *Seminar*, Department of Psychology, University of Maryland, March 2024.

29. Model-free generalized fiducial inference. *Seminar*, Department of Statistics, North Carolina State University, March 2024.

28. Multistate Markov models: Application to dementia progression. *16th International Conference of the ERCIM WG on Computational and Methodological Statistics (CMStatistics 2023)*, HTW Berlin, University of Applied Sciences, Berlin, Germany, December 2023.

27. R package: HMMs for conflict research. *Uncertainty of Forecasting Fatalities in Armed Conflict Research Kitchen*, Peace Research Institute Oslo (PRIO), Oslo, Norway, December 2023.

26. Discussion of "Imprecise probability in statistics: why imprecision is needed, where it comes from, and how it's beneficial". *Seminar*, Department of Statistics, North Carolina State University, October 2023.

25. Discussion of topic-contributed session on astrostatistics. *Joint Statistical Meeting*, Toronto, Canada, August 2023.

24. Model-free generalized fiducial inference. *Eighth Bayesian, Fiducial, and Frequentist Conference*, University of Cincinnati, May 2023.

23. Model-free generalized fiducial inference. *Seminar Series in Statistics and Data Science*. Department of Mathematics, University of Oslo, Norway, December 2022.

22. Introduction to conformal-based uncertainty quantification and applications to automated valuation models. *CAS Workshop: Prediction with Uncertainty*, Oslo, Norway, December 2022.
21. Tutorial on conformal prediction, and a new idea. *Seminar*, Norwegian Computing Center, Oslo, Norway, December 2022.
20. Hidden Markov model applications for conflict data. *CAS Workshop: From Processes to Models*, Oslo, Norway, October 2022.
19. Conformal predictors constructed from generalized fiducial inference. *Joint Statistical Meeting*, Washington, DC, August 2022.
18. The role of Bayesian hidden Markov models in conflict research. *Pre-CAS Workshop on Stability and Change*, Oslo, Norway, May 2022.
17. Research experience at NC State University for undergraduate students. *Seminar*, Department of Mathematics, High Point University, October 2021.
16. Discussion of "A Gibbs sampler for a class of random convex polytopes". *JASA T&M Invited Session, Joint Statistical Meeting*, Seattle, WA, August 2021.
15. Generalized fiducial factor: An alternative to a Bayes factor for forensic identification of source problems. *Joint Statistical Meeting*, Seattle, WA, August 2021.
14. A Bayesian hidden Markov model framework for monitoring and diagnosing critically ill hospital patients. *28th Nordic Conference in Mathematical Statistics*, Tromsø, Norway, June 2021.
13. Generalized fiducial factor: An alternative to a Bayes factor for forensic identification of source problems. *BFF 6.5 – Virtual Workshop on Bayesian, Fiducial, and Frequentist Statistical Inference*, virtual conference hosted on https://researchers.one/, February 2021.
12. The EAS approach for graphical selection consistency in vector autoregression models. *12th International Conference of the European Research Consortium for Informatics and Mathematics Working Group on Computational and Methodological Statistics (CMStatistics)*, University of London, UK, December 2019.
11. The EAS approach for graphical selection consistency in vector autoregression models. *Sixth Bayesian, Fiducial, and Frequentist Conference on Model Uncertainty*, Duke University and SAMSI, May 2019.
10. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, University of Florida Gainesville, January 2019.
9. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, Iowa State University, January 2019.
8. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, University of Illinois Urbana–Champaign, December 2018.
7. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *Seminar*, Department of Statistics, North Carolina State University, December 2018.
6. Non-penalized variable selection via generalized fiducial inference. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, November 2018.
5. Non-penalized variable selection via generalized fiducial inference. *AISC 2018 International Conference on Advances in Interdisciplinary Statistics and Combinatorics*, UNC Greensboro, October 2018.
4. Non-penalized variable selection in high-dimensional settings via generalized fiducial inference. *27th Nordic Conference in Mathematical Statistics*, Tartu, Estonia, June 2018.
3. A Bayesian approach to multi-state hidden Markov models: Application to dementia progression. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, September 2017.

2. Non-penalized variable selection in high-dimensional linear model settings via generalized fiducial inference. *Graduate Seminar*, Department of Statistics and Operations Research, UNC Chapel Hill, February 2017.

1. A Bayesian approach to multi-state hidden Markov models: Application to dementia progression. *Tea Time for Science*, Biomedical Statistics and Informatics, Health Sciences Research, Mayo Clinic, Rochester, MN, August 2016.

AWARDS

- Thank-a-Teacher Award, NCSU 2022
- LeRoy and Elva Martin Award for Teaching Excellence 2021 - 2022
- Best poster award, *Recycled Poster Session of the NC ASA* September 2019

TEACHING AND ADVISING

Courses taught (†courses designed):

- Stochastic processes (measure theoretic) (grad; ST 746 NCSU) Spring '26
- †Bayesian comp. for machine learning (grad; DSA 595 NCSU) Spring '25, '26
- †Nav. the PhD program and beyond (grad; ST 811 NCSU) Fall '24, '25, '26
- †Adv. comp. for stat. reasoning (undergrad; ST 453 NCSU) Spring '22, '23, '24, '26, '27, Fall '24
- Intro. to math. stat. I (undergrad; ST 421 NCSU) Fall '24, '25
- Intro. to prob. and dist. theory (undergrad; ST 371 NCSU) Fall '20
- Linear models (grad; ST 705 NCSU) Spring '20, '21, '22, '23, '24, '25
- Fundamentals of stat. inference I (grad; ST 501 NCSU) Fall '26
- Fundamentals of stat. inference II (grad; ST 502 NCSU) Fall '19
- Fundamentals of regression (grad; ST 503 NCSU) Summer '26, '27
- Grad. student boot camp (real analysis section; UNC) Summer '17
- Intro. to statistics (first year undergrad; STOR 155 UNC) Spring '16, Fall '16

PhD students advised/co-advised:

11. Owen Jacobs (NCSU; expected graduation Spring 2029)
10. Ananya Roy (NCSU; expected graduation Spring 2029)
9. Ayumi Mutoh (NCSU; expected graduation Spring 2027)
8. Shih-Ni Prim, PhD, NCSU – Post-doc at Wake Forest University 2026
7. Emmett Kendall, PhD, NCSU – Tenure-track assistant professor at UT Dallas 2025
6. Naomi Singer, PhD, NCSU – Capital One 2025
5. Neil Dey, PhD, NCSU – Google 2025
4. Jimmy Hickey, PhD, NCSU – Optum 2024
3. Mohamed Abba, PhD, NCSU – Amazon 2023
2. Alexander Murph, PhD, UNC – Tenure-track assistant professor at Univ Pittsburgh 2023
1. Salil Koner, PhD, NCSU – Tenure-track assistant professor at UC Riverside 2021

PhD committees served on:

13. Dezhong (Tony) Xu (NCSU; expected graduation TBD)
12. Charles Zhao (UNC Chapel Hill; expected graduation Summer 2027)
11. Prithwish Ghosh (NCSU; expected graduation Summer 2029)

10. Jisu Oh (NCSU; expected graduation Summer 2027)
9. Shuvrarghya Ghosh (NCSU; expected graduation Summer 2027)
8. Matthew Singer (NCSU; expected graduation Fall 2025)
7. Ian Grace, PhD, NCSU 2025
6. Alvin Sheng, PhD, NCSU 2024
5. Xinyu Zhang, PhD, NCSU 2024
4. Annie Tang, PhD, NCSU 2023
3. Kang Wang, PhD, NCSU 2023
2. Yin-Jen Chen, PhD, NCSU 2022
1. Pei-Shien Wu, PhD, NCSU 2022

Undergraduate students mentored:

10. Aditya Basarkar (NCSU; expected graduation 2026)
9. Madeline Mariano (Rochester Institute of Technology; REU student 2024)
8. Adam Ousherovitch (University of California, Berkley; REU student 2024)
7. Natalia Velez-Rios (Vasser College; REU student 2024)
6. Fiona Romanoschi (University of Texas, Austin; REU student 2024)
5. Jack Ferrell (University of Florida; REU student 2021)
4. Carolina Kapper (High Point University; REU student 2021)
3. Maxwell Lovig (University of Louisiana, Lafayette; REU student 2021)
2. Emiliano Planchon (NCSU; REU student 2021)
1. Pragya Haravu (NCSU 2023)
